

Newspaper Hat Over 200 Years Old

Much research has been done to establish the origin of this unique headpiece which is worn by pressmen to protect their hair from ink, grease, oil and paper lint. It has never been determined exactly when or where the first paper hat was worn, but records show that it was being used in the United States as early as 1784.

TONIGHT

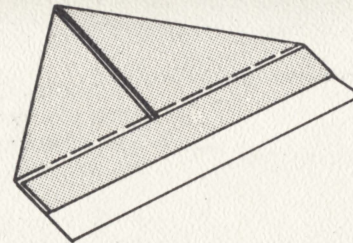

EVENTS

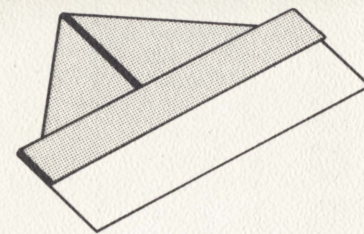

1. Take two full pages of News-day and lay them spread open and flat on table.

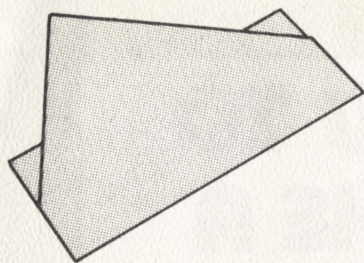

2. Turn down the top corners and crease so they meet evenly.

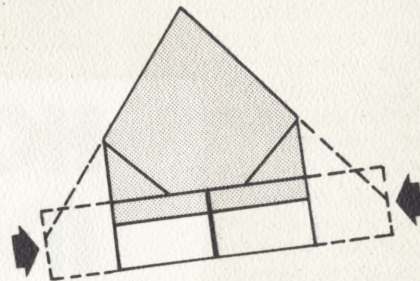

3. Fold up the single top sheet from the bottom to meet the folded corners.

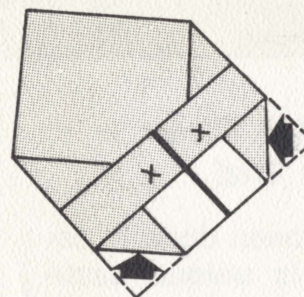

4. Fold this same piece once more over the folded corners.

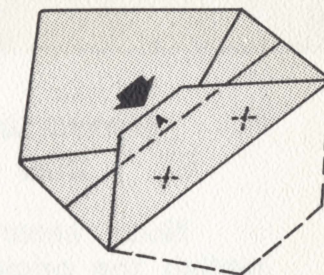

5. Now flip the whole works over so that it's upside down, point facing away from you.

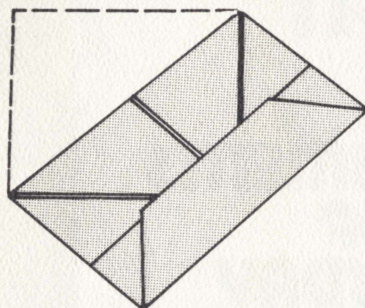

6. Fold both sides over so that edges meet.

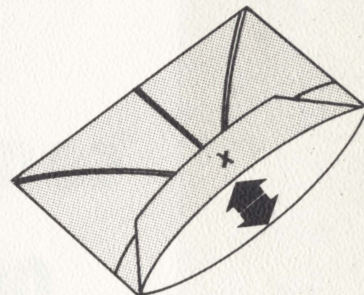

7. Turn up both lower left and right corners to bottom of folded band marked "X."

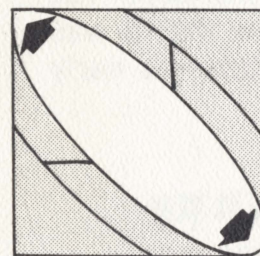

8. Fold bottom up across band along dotted line "A" and tuck into band as arrows show.

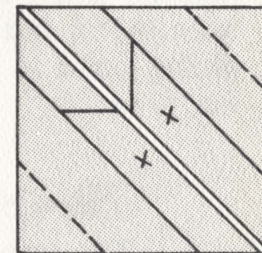

9. Now fold top down, crease well, and tuck it under band also.

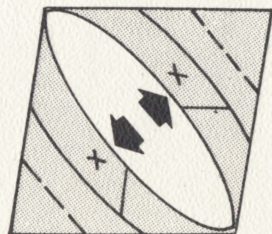

10. Hold hat at "X" (top and bottom) and spread it open ...

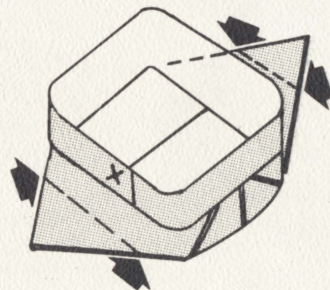

like so...

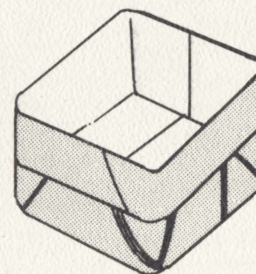

... until it is a square, flat shape as shown.

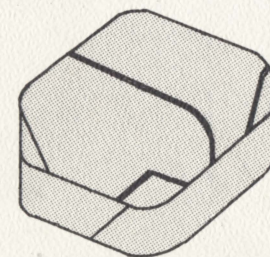

11. Again holding at "X", open hat.

12. Crease along indicated line

... and tuck into band. Repeat this step on the other side.

13. And here's your newspaper hat. Remember to square the corners well to give it that "professional" look.
